## VIBRATION ABSORPTION

# THE VIBRATION DAMPERS

That extend the safe working hours

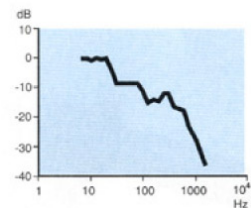

Art.No. 51 18 12. Bushing fitting the control handle of pneumatic machines and tools. The higher frequencies of vibration, the better damping effect.

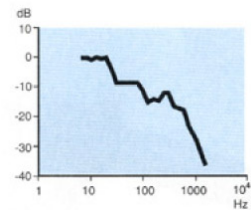

Bushing fitting electric machines and tools. It clarifies the directives of EU for machine safety and lies below 2,5 m/s<sup>2</sup>.

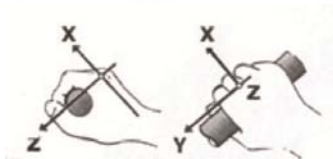

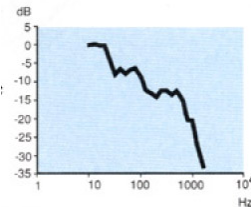

Art.No. 54 10 95. Support handle for light handheld machines and tools below 8 kilos. It is available with the threads M8 – M14.

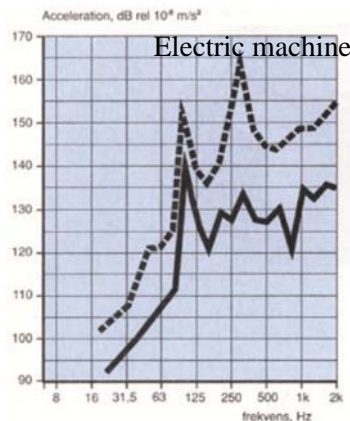

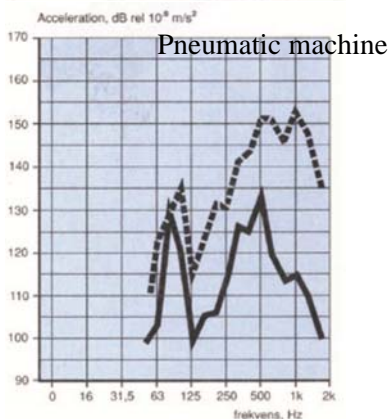

Art.No. 54 10 96 Support handle for light handheld machines and tools below 8 kilos. It is available with the threads M8-M10. The same damping effect as the handle No. 541095.

Art.nr. 54 10 95-60. Support handle for heavy handheld machines and tools above 8 kilos. It is available with the threads M8 – M14.

Frequency weighed acceleration level (m/s<sup>2</sup>). They are weighed in three directions: X, Y and Z. The direction that gives the highest vibration frequencies will be decisive..
